# Mission

Our team of surveyors and consultants, are highly qualified and motivated ensuring a close cooperation.

We have the in-depth knowledge and background intelligence for directing and instructing the proper handling of all types of cargo with precision and care – whether it is small, break-bulk, heavy lift or project cargo.

By working closely together as we can ensure minimum 4-eye principle within our projects.

A good team work is what matters in the end.

# Vision

We strive to complete every project to the full satisfaction of our clients.

In order to optimize resources it is our aim to engage earliest in the planning phase of each project.

We strongly believe that every project's challenge shall be tackled from all possible sides - this is why we gathered experts from various parts of the industry now working for one common goal.

Continuous personal development is ensured to be ready for every challenge - now and tomorrow.

Overall Project Management

FEM Analysis

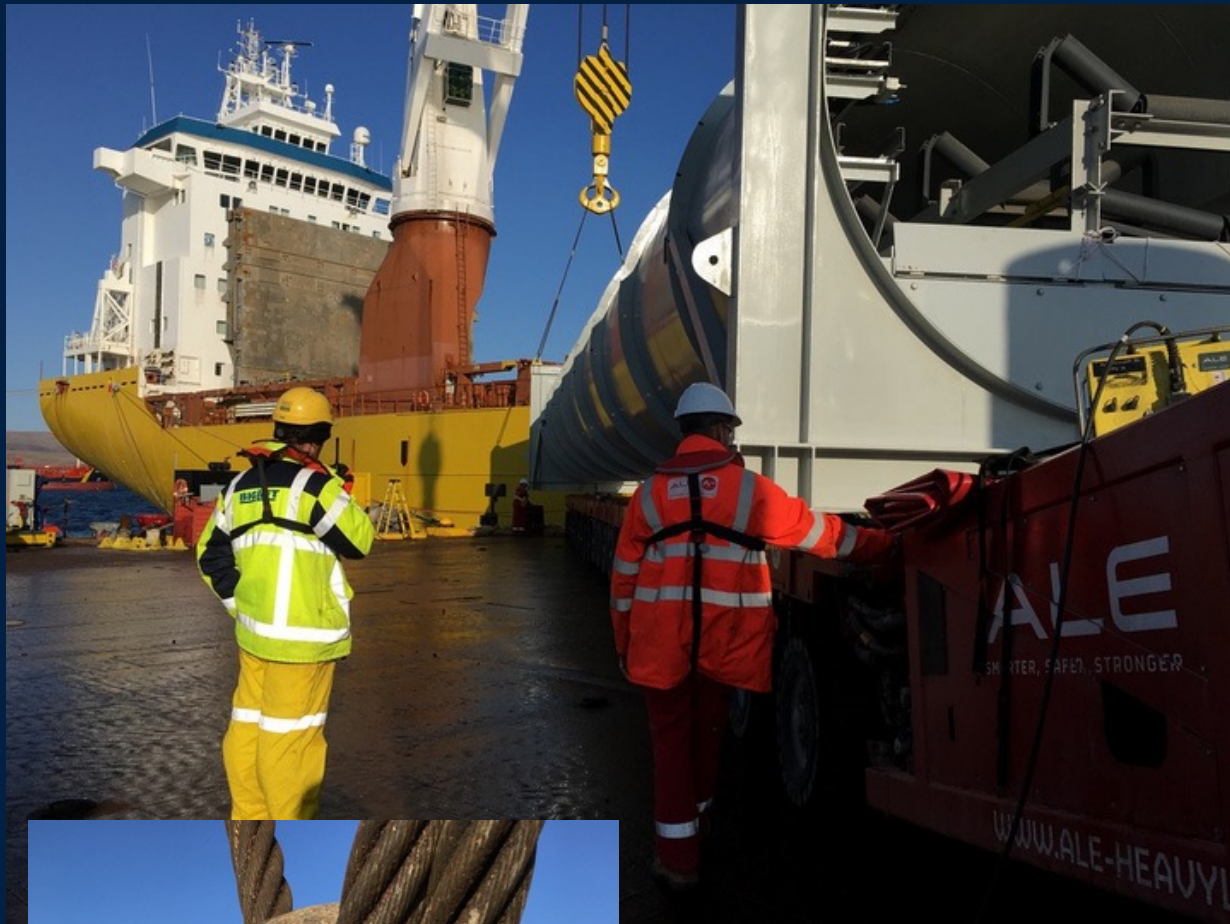

Our personnel has been trusted as a MWS for an EPC fertilizer project located at the northern shores of Borneo. Full involvement from pre-engineering phase until the final delivery of cargoes at site.

# Brunei

Located in the Nunavut territories of the Canadian Arctic at a latitude beyond 70°N we were part of the pre-planning and execution of the project which involved RoRo and LoLo operations of cargoes up to 1500 mtons unit weight.

# Baffinland
